PROFILE

Highly motivated Information Technology graduate with strong expertise in Full Stack Web Development, Data Structures and Algorithms (DSA), and Machine Learning, seeking a software development role to build scalable and efficient solutions.

EDUCATION

Gujarat Technological University

Gujarat, India

Bachelor of Engineering in Information Technology (IT)

2021 – 2025

- Among the top 5% of the batch
- **Relevant subjects:** Web Development, Data Structures & Algorithms (DSA), Computer Networks, Cyber Security, Data Science, Advanced Machine Learning (ML), Artificial Intelligence (AI)

SKILLS

Technical: Python, JavaScript, SQL, MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3, Bootstrap, Django, Flask, REST APIs, Machine Learning (Scikit-learn, NumPy, Pandas, Matplotlib), Computer Vision (YOLO, OpenCV, PyAV)

Tools & Platforms: Git, GitHub, Docker, Linux, Postman, Jupyter Notebook

EXPERIENCE

CSCI Steel Corporation India Pvt. Ltd.

Bharuch, India

Graduate Engineer Trainee (G.E.T)

July 2025 – Present

- Contributed to an AI-Enabled Fire & Security Surveillance System to reduce false fire and smoke detections.
- Trained and optimized an XGBoost regression model for iron loss prediction using hyperparameter tuning.
- Developed Java-based ERP solutions, including a paperless PRS approval workflow and process automation utilities.

Techomax Solution

Bharuch, India

Web Development Intern

Jan 2025 – Apr 2025

- Developed full-stack applications using MERN stack technologies
- Built responsive UI and REST APIs using React.js, Tailwind CSS, Node.js, and MongoDB
- Contributed to ATLAS Super App and built full-stack clones of e-commerce platforms

PROJECTS

AI Enabled Fire & Security Surveillance System

Dec 2025 – Feb 2026

- Implemented No-Detection Zones, Persistence Checks, and Veto Models to reduce false fire and smoke detections in an AI-based surveillance system (YOLO, OpenCV, PyAV, Flask).

Avg. Iron Loss Prediction (in W/KG)

Sep 2025 – Nov 2025

- Built regression-based ML model using Scikit-learn for predicting iron loss (W/KG).

ERP projects

Aug 2025 – Jan 2026

- Implemented the paperless project for PRS PDF generation with approval flow.
- Created JAVA batch file for sending IRS delay notifications and worked on overhaul of Inventory and dispatch reports.

ATLAS Super App

May 2024 – Jun 2024

- Built a multi-module app (E-commerce, Video, News, AI Chatbot) using React.js, Node.js, Express.js, and MongoDB.
- Developed and integrated front-end and back-end components into a unified super app.

E-Pharmacy Super App

Jan 2025 – Apr 2025

- Developed a full-stack E-Pharmacy application using React.js, Node.js, Express.js, and MongoDB.
